JOURNAL OF ELECTROCARDIOLOGY

An International Publication
for the Study of the Electrical Activities of the Heart

Editor-in-Chief
ZANG Z. ZAO, M D, San Diego, Ca.

Assistant Editor
JOEL S. KARLINER, M D, San Diego, Ca.

Associate Editors
H. DAVID FRIEDBERG, M D, Milwaukee, Wi. EUGENE LEPESCHKIN, M D, Burlington, Vt.
LARS WERKO, M D, Göteberg, Sweden

EDITORIAL CONSULTANTS

J.A. ABILDSKOV, MD, Salt Lake City, Ut.
MARIANO ALIMURUNG, MD, Manila, Philippines
R.S. AMIROV, MD, Moscow, USSR
EVANGELOS T. ANGELAKOS, MD, Philadelphia, Pa.
CHRIST ARAVANIS, MD, Athens, Greece
L.E. BAKER, PhD, Houston, Tx.
SERGE BAROLD, MD, Rochester, N.Y.
ALBERTO BENCHIMOL, MD, Phoenix, Az.
F.W. BESWICK, MD, Salisbury, England
CHANDLER McC. BROOKS, MD, Brooklyn, N.Y.
C.A. CACERES, MD, Washington, D.C.
AUGUSTIN CASTELLANOS, JR, MD, Miami, Fl.
MICHEL CHABOT, MD, Montreal, Canada
WILLIAM M. CHARDACK, MD, Buffalo, N.Y.
E. CORABOEUF, MD, Orsay, France
ELIOT CORDAY, MD, Beverly Hills, Ca.
BENJAMIN COVINO, MD, Worcester, Ma.
PAUL F. CRANEFIELD, MD, New York, N.Y.

JOURNAL OF ELECTROCARDIOLOGY

Table of Contents
Volume 7, 1974

Number 1

Original Communications:

Effect of VCG Sensitivity to Dipole Content in Detecting Infarctional Changes.
By *N.C. Flowers, J.C. Johnson, and L.G. Horan* 1

Quantitative Comparison of Exercise Vectorcardiograms and Findings at Selective Coronary Arteriography.
By *C.A. Ascoop, C.A. Distelbrink, P. de Lang and J. van Bemmel* 9

The Effect of Excess Lactate Upon the Excitability of the Sheep Purkinje Fibers.
By *S. Wissner* 17

Vectorcardiographic Study of QRS in Patients with Transvenous Pacemakers and Myocardial Infarction.
By *H.E. Kulbertus, and F. De Leval-Rutten* 27

QRS Duration in Chronic Obstructive Lung Disease.
By *S.S. Zambrano, M.S. Moussavi, and D.H. Spodick* 35

The Vectorcardiogram in Prolapsed Mitral Leaflet Myocardopathy.
By *S. Cha, A. Gooch, S. Yang, and H. Goldberg* 37

The Clockwise Horizontal Plane T Loop: A Study of 73 Cases.
By *F. Smithline, R.I. Hamby, J. Hilsenrath, and I. Hoffman* 43

Analysis of Discrepancies Between VCG and ECG Interpretation of Inferior Wall Myocardial Infarct.
By *M. Kohno, Y. Watanabe, M. Segal, and E. Simonson* 57

Case Studies:

Effect of Diphenylhydantoin on Induced Aberrant Conduction.
By *J.K. Bissett, N.D.B., de Soyza, J.J. Kane, and J.E. Doherty* 65

Hyperactive Carotid Sinus Reflex and His Bundle Electrography.
By *S.P. Glasser, R.J. McCarty, and L.A. Iannone* 71

Sinus Bradycardia Due to Lidocaine.
By *R. Parameswaran, D. Kahn, R. Monheit, and H. Goldberg* 75

Profound Hypotension and Bradycardia After a Single Bolus of Lidocaine.
By *H. Marriott and K. Phillips* 79

Transient Left Posterior Hemiblock in Acute Myocarditis.
By *K. Forfang and C. Lippestad* 83

Multiform Wolff-Parkinson-White Syndrome.
By *A. Sarkas, A. Sideris, and G. Valianos* 87

The Dynamic ECG in the Diagnosis of Variant Angina Pectoris.
By *M. Laks, J. Dahlgren, and W.J. Mandel* 93

Recent Progress in Cardiac Pacing:

Progress in Pacemaker Longevity.
By *H.D. Friedberg and R.C. Lillehei* 97

Number 2

Original Communications:

His Bundle Electrogram During Coronary Arteriography in Man.
By *F.K. Nakhjavan, A. Smith, M. Dratch and H. Goldberg* 101

ECG Changes in Experimental Acute Pulmonary Hypertension with and without Hypoxia.
By *M. Ahmad, G. Blomqvist and C.B. Mullins* 109

Severity and Distribution of Coronary Artery Disease in Patients with Normal Resting Electrocardiograms.
By *K. Redy, R. Hamby, J. Hilsenrath, F. Smithline and I. Hoffman* 115

Intracellular Stimulation and Recording from Single Cardiac Cells in the Rabbit Atrium.
By *J. Ushiyama and C. Brooks* 119

The Effect of Acute Alterations in Blood Sodium on the ECG.
By *T.C. Gibson, K. Sugioka and M. Sugioka* 127

Electrograms of the Sinu-Atrial Node in Dogs Following Surgical Implantation of Electrodes on the Epicardium.
By *R. Ramlau* 137

Analysis of T Wave Changes in Clinical Hyperkalemia Associated with Patterns of Left Ventricular Hypertrophy and Strain.
By *H.C. Cohen, E.G. Gozo and A. Pick* 149

The Electrocardiogram From Miniature Swine Recorded with the McFee-Axial Reference System.
By *R. Hamlin, R. Burton, S. Leverett and J. Burns* 155

Case Studies:

Mobitz I Intraventricular Block as a Cause of Mobitz I Atrioventricular Block.
By *A. Mazzoleni* 163

The Mechanism of Supraventricular Tachycardia. Ectopic (Parasystolic) Focus Versus Re-Entry.
By *N. El-Sherif* 169

Pseudofusion Beats Masquerading as Pacemaker Failure.
By *C.M. Martin and J.J. Kleid* 179

A Rare Form of Wenckebach Atrioventricular Block.
By *W.S. Abernathy* 183

Recent Progress in Cardiac Pacing:

Iso-Potential Method for Monitoring Pacemaker Patients.
By *J. Grayzel and P. Williams* 187

Number 3

Original Communications:

Left-Posterior Hemiblock. Clinical and Vectorcardiographic Study of Twenty Cases.
By *V.M. Lopes, J.J. Pereira Miguel, D.D. dos Reis, B.C.B. da Costa, and F. de Padua* 197

Duration of the Ectopic Hypersensitivity to Adrenergic Stimulation After Coronary Occlusion in the Canine Heart.
By *A.J. Bocage, H. Otero, and A.S. Harris* 215

Etiology of Left Bundle Branch Block. Hemodynamic and Angiographic Studies.
By *H. Dizadji, P. Tahmooressi, and W.F. Cernock* 221

The McFee-Parungao Vectorcardiogram in Normal Dogs.
By *P. Bruninx and H.E. Kulbertus* 227

An Evaluation of Several Cardiac Activation Models.
By *R. Plonsey* 237

AV Nodal Transmission: A Proposed Electromechanical Mechanism.
By *G. Pollack* 245

Special Article:

Terminology and Standardization in Vectorcardiography.
By *G.E. Dower* 259

Case Studies:

Heart Block During Cardiac Catheterization — Demonstration by His Bundle Recording and Documentation of Concealed Retrograde A-V Nodal Conduction.
By *J. Fishenfeld, K.B. Desser, A. Benchimol, and S. Promisloff* 265

Atrioventricular Conduction Disturbances with Hypokalemia in Renal Tubular Acidosis.
By *J. Giangiacomo and R. Klint* 273

Left Anterior Hemiblock During Right Coronary Angiography.
By *A. Betriu, E. Esplugas, and M.G. Bourassa* 275

Annotation:

Radiotransparent Electrodes for Recording Precordial Electrocardiographic Leads During Catheterization.
By *H.J.L. Marriott and H. T. Castillo* 281

Recent Progress in Cardiac Pacing:

Triggering of a Unipolar Demand Pacemaker by Chest Wall Stimulation.
By *H. Ector, A. J. Blankestyn, M. Bayart, and H. De Geest* 283

Number 4

Original Communications:

Evaluation of Frontal Plane QRS Loop Rotation in Vectorcardiographic Diagnosis
By *P.F. Poblete, P.M. Kini, C.D. Batchlor, and H.V. Pipberger* 287

Some Correlations Between Electrocardiographic Findings and Lung Volumes in Pulmonary Diseases
By *D.A. Sideris and D.P. Katsadoros* 295

Ratio of Transverse to Longitudinal Resistivities of Isolated Cardiac Muscle Fiber Bundles
By *N. Sperelakis and R.L. Macdonald* 301

Polarcardiographic Responses to Maximal Exercise in Middle-Aged Women
By *R.A. Bruce, G.E. Dower, S. Whitkanack, and A.E. Voigt* 315

In Vivo Myocardial Excitability Studied by Simultaneous Electrocardiogram and Electrogram
By *S. Rogel and Y. Hasin* 323

The Vectorcardiographic Quantitation of Pulmonary Hypertension in Mitral Stenosis
By *N. Haberern, W.B. Clarke, M. Mecredy, and P.M. Shah* 331

Conduction Disturbances Due to Enhanced Phase 4 Depolarization in the Bundle Branches of the Canine Heart
By *A. Kretz, H.O. DaRuos, J.R. Leguizamon Palumbo, A. Ferrara, and E. Garcilazo* ... 339

A Relation Between the Abnormal T Loop and the Exercise Test
By *K. Suzuki and S. Toyama* 347

Case Studies:

Paroxysmal Tachycardia with Atrioventricular Dissociation in a Patient with a Variant of Pre-Excitation Syndrome
By *A.L. Mark and L.L. Basta* 355

Intermittent Parasystole with Concealed Bigeminy
By *A. Brusca and F. Orzan* 365

Recent Progress in Cardiac Pacing:

Suppression of a Ventricular-Inhibited Bipolar Pacemaker by Skeletal Muscle Activity
By *S. Widlansky and D.P. Zipes* 371

Progress in Pacemaker Technology
By *G. D. Green* 375

Subject Index Volume 7

A

Action potential
effect of excess lactate upon the excitability of sheep Purkinje fiber, 1:17-26

Adrenergic stimulation
duration of ectopic hypersensitivity to adrenergic stimulation after coronary occlusion in canine heart, 3:215-220

Age
PCG responses to maximal exercise in middle-aged women, 4:315-322

Angina pectoris
dynamic ECG in diagnosis of variant angina pectoris, 1:93-96

Angiography
etiology of LBBB. Hemodynamic and angiographic studies, 3:221-226
left anterior hemiblock during right coronary angiography, 3:275-279

Animal studies
cats
ratio of transverse to longitudinal resistivities of isolated cardiac muscle fiber bundles, 4:301-314
dogs
conduction disturbances due to enhanced phase 4 depolarization in bundle branches of canine heart, 4:339-346
duration of ectopic hypersensitivity to adrenergic stimulation after coronary occlusion in canine heart, 3:215-220
effect of acute alterations in blood sodium on ECG, 2:127-136
ECG changes in experimental acute pulmonary hypertension with and without hypoxia, 2:109-114
electrograms of sinu-atrial node in dogs following surgical implantation of electrodes on epicardium, 2:137-148
in vivo myocardial excitability studied by simultaneous ECG and electrodes, 4:323-330
McFee-Parungao VCG in normal dogs, 3:227-236
frogs
ratio of transverse to longitudinal resistivities of isolated cardiac muscle fiber bundles, 4:301-314
minipigs
ECG from miniature swine recorded with McFee-axial reference program, 2:155-162
rabbits
intracellular stimulation and recording from single cardiac cells in rabbit atrium, 2:119-126
sheep
effect of excess lactate upon the excitability of sheep Purkinje fiber, 1:17-26

Annotations
radiotransparent electrodes for recording precordial electrocardiographic leads during catheterization, 3:281-282

Arrhythmias
duration of ectopic hypersensitivity to adrenergic stimulation after coronary occlusion in canine heart, 3:215-220

Atrio-ventricular
conduction disturbances with hypokalemia in renal tubular acidosis, 3:273-274
node
AV nodal transmission: proposed electromechanical mechanism, 3:245-258

B

Bigeminy
Mobitz I intraventricular block as cause of Mobitz I AV block, 2:163-168
intermittent parasystole with concealed bigeminy, 4:365-369

Block
conduction disturbances due to enhanced phase 4 depolarization in bundle branches of canine heart, 4:339-346
during cardiac catheterization, 3:265-272
etiology of LBBB. Hemodynamic and angiographic studies, 3:221-226
left anterior hemiblock during right coronary angiography, 3:275-279
left posterior hemiblock. Clinical and VCG study of 20 cases, 3:197-214
mechanism of supraventricular tachycardia. Ectopic (parasystolic) focus vs. re-entry, 2:163-168
Mobitz I intraventricular block as cause of Mobitz I AV block, 2:163-168

rare form of Wenckebach AV block, 2:183-185
transient left posterior hemiblock in acute myocarditis, 1:83-85

Blood sodium
effect of acute alterations in blood sodium on ECG, 2:127-136

Bradycardia
His bundle electrogram during coronary arteriography in man: studies at spontaneous and constant heart rates, 2:101-107
profound hypotension and bradycardia after single bolus of lidocaine, 1:79-82
sinus bradycardia due to lidocaine: clinical-electrophysiologic correlations, 1:75-78

Bundle branch
conduction disturbances due to enhanced phase 4 depolarization in bundle branches of canine heart, 4:339-446

C

Carotid sinus reflex
and His bundle electrography, 1:71-74

Catheterization
heart block during cardiac catheterization, 3:265-272
radiotransparent electrodes for recording precordial electrocardiographic leads during, 3:281-282

Case studies
atrioventricular conduction disturbances with hypokalemia in renal tubular acidosis, 3:273-274
dynamic ECG in diagnosis of variant angina pectoris, 1:93-96
effect of DPH on induced aberrant conduction, 1:65-69
heart block during cardiac catheterization, 3:265-272
hyperactive carotid sinus reflex and His bundle electrography, 1:71-74
left anterior hemiblock during right coronary angiography, 3:275-279
mechanism of supraventricular tachycardia. Ectopic (parasystolic) focus vs. re-entry, 2:169-178
Mobitz I intraventricular block as cause of Mobitz I AV block, 2:163-168
multiform Wolff-Parkinson-White syndrome, 1:87-92
paroxysmal tachycardia with AV dissociation in patient with variant of pre-excitation syndrome, 4:355-364
profound hypotension and bradycardia after single bolus of lidocaine, 1:79-82
pseudofusion beats masquerading as pacemaker failure, 2:179-181
rare form of Wenckebach AV block, 2:183-185
sinus bradycardia due to lidocaine: clinical-electrophysiologic correlations, 1:75-78
suppression of ventricular-inhibited bipolar pacemaker by skeletal muscle activity, 4:271-374
transient left posterior hemiblock in acute myocarditis, 1:83-85
triggering of unipolar demand pacemaker by chest wall stimulation, 3:283-286

Cellular cardiology
AV nodal transmission: proposed electromechanical mechanism, 3:245-258
effect of excess lactate upon the excitability of sheep Purkinje fiber, 1:17-26
evaluation of several cardiac activation models, 3:237-244
intracellular stimulation and recording from single cardiac cells in rabbit atrium, 2:119-126
ratio of transverse to longitudinal resistivities of isolated cardiac muscle fiber bundles, 4:301-314

Children
AV conduction disturbances with hypokalemia in renal tubular acidosis, 3:273-274

Chronic obstructive lung disease
QRS duration in, 1:35-36

Coronary arteriography
His bundle electrogram during coronary arteriography in man: studies at spontaneous and constant heart rates, 2:101-107
quantitative comparison of exercise VCG and findings at selective coronary arteriography, 1:9-16

Coronary artery disease
severity and distribution of, in patients with normal resting ECGs, 2:115-117

D

Depolarization
conduction disturbances due to enhanced

phase 4 depolarization in bundle branches of canine heart, 4:339-346

Diagnosis
evaluation of frontal plane QRS loop rotation in VCG diagnosis, 4:287-294

Diphenylhydantoin (DPH)
effect of DPH on induced aberrant conduction, 1:65-69

Dipolar component
effect of VCG sensitivity to dipole content in detecting infarctional changes, 1:1-8

E

Ectopic focus
intermittent parasystole with concealed bigeminy, 4:365-369

Electrodes
radiotransparent electrodes for recording precordial electrocardiographic leads during catheterization, 3:281-282

Electrocardiogram (ECG)
analysis of discrepancies between VCG and ECG interpretation of inferior wall myocardial infarct, 1:57-64
dynamic ECG in diagnosis of variant angina pectoris, 1:93-96
ECG changes in experimental acute pulmonary hypertension with and without hypoxia, 2:109-114
effect of acute alterations in blood sodium on, 2:127-136
from miniature swine recorded with McFee-axial reference program, 2:155-162
in vivo myocardial excitability studied by simultaneous ECG and EG, 4:295-300
severity and distribution of coronary artery disease in patients with normal resting ECGs, 2:115-117
some correlations between ECG findings and lung volumes in pulmonary disease, 4:295-300

Electrograms
heart block during cardiac catheterization, 3:265-272
His bundle electrogram during coronary arteriography in man: studies at spontaneous and constant heart rates, 2:101-107
hyperactive carotid sinus reflex and His bundle electrography, 1:71-74
in vivo myocardial excitability studied by simultaneous ECG and EG, 4:323-330
of sinu-atrial node in dogs following surgical implantation of electrodes on epicardium, 2:137-148

Exercise
PCG responses to maximal exercise in middle-aged women, 4:315-322
relation between abnormal T loop and exercise test, 4:347-354

H

Hyperkalemia
analysis of T wave changes in clinical hyperkalemia associated with patterns of left ventricular hypertrophy and strain, 2:149-153

Hypertrophy
analysis of T wave changes in clinical hyperkalemia associated with patterns of left ventricular hypertrophy and strain, 2:149-153

Hypoxia
ECG changes in experimental acute pulmonary hypertension with and without hypoxia, 2:109-114

I

Instrumentation
progress in pacemaker longevity, 1:97-100
progress in pacemaker technology, 4:375-378
radiotransparent electrodes for recording precordial electrocardiographic leads during catheterization, 3:281-282

L

Lactate
effect of excess lactate upon the excitability of sheep Purkinje fiber, 1:17-26

Lidocaine
multiform Wolff-Parkinson-White syndrome, 1:87-92
paroxysmal tachycardia with AV dissociation in patient with variant of preexcitation syndrome, 4:355-364
profound hypotension and bradycardia after single bolus of lidocaine, 1:79-82
sinus bradycardia due to lidocaine: clinical-electrophysiologic correlations, 1:75-78

Lung volumes
some correlations between ECG findings and lung volumes in pulmonary diseases, 4:295-300
VCG study of QRS in patients with transvenous pacemakers and MI, 1:27-33

M

McFee-axial reference system
ECG from miniature swine recorded with, 2:155-162
McFee-Parungao VCG in normal dogs, 3:227-236

Methodology
iso-potential method for monitoring pacemaker patient, 2:187-196

Mitral stenosis
VCG quantitation of pulmonary hypertension in, 4:331-338

Mobitz block, *see* Block

Model
clockwise horizontal plane T loop: a study of 73 patients, 1:43-56
evaluation of several cardiac activation models, 3:237-244

Monitoring
iso-potential method for monitoring pacemaker patient, 2:187-196

Myocardial
infarction
analysis of discrepancies between VCG and ECG interpretation of inferior wall MI, 1:57-64
excitability
in vivo myocardial excitability studied by simultaneous ECG and EG, 4:323-330

Myocarditis
transient left posterior hemiblock in acute myocarditis, 1:83-85

O

Occlusion
duration of ectopic hypersensitivity after coronary occlusion in canine heart, 3:215-220

P

Pacing
iso-potential method for monitoring pacemaker patient, 2:187-196
progress in pacemaker longevity, 1:97-100
progress in pacemaker technology, 4:375-378
pseudofusion beats masquerading as pacemaker failure, 2:179-181
suppression of ventricular-inhibited bipolar pacemaker by skeletal muscle activity, 4:371-374
triggering of unipolar demand pacemaker by chest wall stimulation, 3:283-286
VCG study of QRS in patients with transvenous pacemakers and MI, 1:27-33

Polarcardiography
responses to maximal exercise in middle-aged women, 4:315-322

Prelapsed mitral leaflet myocardopathy
VCG in, 1:37-42

Propagation
evaluation of several cardiac activation models, 3:237-244
AV nodal transmission: proposed electromechanical mechanism, 3:245-248

Pseudofusion
masquerading as pacemaker failure, 2:179-181

Pulmonary
diseases
some correlations between ECG findings and lung volumes in, 4:295-300
hypertension
ECG changes in experimental acute pulmonary hypertension with and without hypoxia, 2:109-114
VCG quantitation of pulmonary hypertension in mitral stenosis, 4:331-338

Purkinje fiber
effect of excess lactate upon the excitability of sheep Purkinje fiber, 1:17-26

Q

QRS
duration in chronic obstructive lung disease, 1:35-36
loop
evaluation of frontal plane QRS loop rotation in VCG diagnosis, 4:287-294
VCG study of QRS in patients with transvenous pacemakers and MI, 1:27-33

R

Renal tubular acidosis
AV conduction disturbances with hypokalemia in, 3:273-274

Resistivities
ratio of transverse to longitudinal resistivities of isolated cardiac muscle fiber bundles, 4:301-314

S

Sino-atrial node
electrograms of sinu-atrial node in dogs following surgical implantation of electrodes on epicardium, 2:137-148

S-T segment
quantitative comparison of exercise VCG and findings at selective coronary arteriography, 1:9-16

T

Tachycardia
mechanism of supraventricular tachycardia. Ectopic (parasystolic) focus vs. reentry, 2:169-178
paroxysmal tachycardia with AV dissociation in patient with variant of pre-excitation syndrome, 4:355-364

Terminology
and standardization in VCG, 3:259-264

Theoretical studies
AV nodal transmission: proposed electromechanical mechanism, 3:245-258
evaluation of several cardiac activation models, 3:237-244

T loop
clockwise horizontal plane T loop: a study of 73 patients, 1:43-56
relation between abnormal T loop and exercise test, 4:347-354

V

Vectorcardiogram (VCG)
analysis of discrepancies between VCG and ECG interpretation of inferior wall MI, 1:57-64
effect of VCG sensitivity to dipole content in detecting infarction changes, 1:1-8
evaluation of frontal plane QRS loop rotation in VCG diagnosis, 4:287-294
left posterior hemiblock. Clinical and vectorcardiographic study of 20 cases, 3:197-214
McFee-Parungao VCG in normal dogs, 3:227-236
terminology and standardization in VCG, 3:259-264
VCG in prolapsed mitral leaflet myocardopathy, 1:37-42
VCG quantitations of pulmonary hypertension in mitral stenosis, 4:331-338
VCG study of QRS in patients with transvenous pacemakers and myocardial infarction, 1:27-33

Vectors
T-
VCG in prolapsed mitral leaflet myocardopathy, 1:37-42

W

Wave
T-
analysis of T wave changes in clinical hyperkalemia associated with patterns of left ventricular hypertrophy and strain, 2:149-153

Wenckebach AV block
see Block

Wolff-Parkinson-White syndrome
Multiform WPW syndrome, 1:87-92
